WE ARE

A family owned business based in North Wales that has specialized in creating the highest quality wooden staircases across the whole of the UK.

WE CREATE AND SUPPLY

Handcrafted oak /walnut staircases of all styles – with a focus on having the finest quality, finish and detail to fit your precise needs at a price that will not break the bank.

OUR PASSION

for woodworking is evident in everything we do, from the initial design consultation through to the finished product.

OUR GOAL

is to provide our clients with beautiful, functional pieces that will last for generations.

STAIRCASES

TESTIMONIALS

CENTRAL SPINE STAIRCASE

What can I say. From start to finish APEX we're a delight to deal with. Their knowledge and craftsmanship was impeccable. They listened to everything we wanted and were able to create our dream and more. With a very tight time scale to keep our build run smoothly. They were respectful to us and our home. I really can't recommend this company enough. Thank you so much.

Kate Jones

CURVED STAIRCASE

We used Apex Oak Frames for a Curved open tread oak and glass bespoke staircase on a ultra-modern new build 5 bedroom house. Price was very competitive and so order was placed. Stairs arrived, were fitted and look fabulous - excellent quality. Client more than happy. I would highly recommend Costi and would definitely use him again.

Phil

STRAIGHT CENTRAL SPINE STAIRCASE

When you live in a Dutch barn the challenge is always finding a company with skills, knowledge and experience to deliver that wow factor. When Costi from Apex Oak Frames visited us to survey our property he didn't disappoint, with his experience he measured and prepared drawings all in the same visit to bring our vision for the space to live. Apex provided photos throughout manufacture which made us feel part of the journey. The materials were delivered to us in advance of the install and Costi and Alex arrived as agreed to commence the project. The six days of installation within our home were professional and delivered in a safe manner. I would highly recommend this business for the smallest or largest project.

James & Becky

TRADITIONAL STAIRCASE

As a private client and an architectural designer, I worked with Apex Oak Frames on many projects. Apex Oak Frames have worked on many of our projects for BR Architecture and the clients are very happy with the quality of the work. Very professional and hard working. We've even had them design, manufacture and install in and around our own home - such as an oak frame garage, oak gates, bespoke staircase and many oak frame features internally. I can highly recommend Apex Oak Frames with any timber project- big or small.

OUR STAIRCASE MODELS

1

CENTRAL SPINE STAIRCASE

Our most popular range of style – a central spine stair is flawless, self-supporting with a floating effect promoting a sense of lightness and openness. A great fit for any house, restaurant or office that aims more towards timeless design. They can be manufactured in many layout designs including Straight, Quarter landing, Half landing and Winder designs.

3

CURVED STAIRCASE

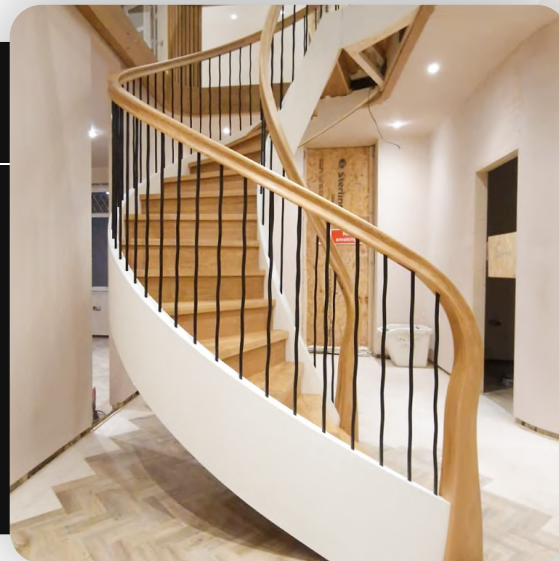

Are often fitted in the atrium of the house or villas where there is a lot of space available, and the curved staircase becomes the central feature. In houses renovations curved stairs for deck or mezzanine are able to give a dramatic touch of style.

2

SPIRAL STAIRCASE

Are not just space efficient, they can also be a focal point in many domestic and commercial spaces. Thanks to the sinuous and attractive twisted stairs design the spiral staircase is able to bring a distinctive touch of class to any interior design. Self-supporting design – no requirements for newel posts for a contemporary look.

4

TRADITIONAL CUT OR OPEN STRING STAIRCASE

Are unique in their ability to dazzle your guests with an outstanding, timeless visual display. Their elegant presentation is achieved by cutting the stringers so that the treads are positioned on top of the stringer, this way the spindles sit on top of the treads making a minimalistic presentation. The newel post is uniquely crafted featuring ornate details to offer an element of grandeur. It works perfectly painted in your preferred colour and paired with black spindles for a nice contrast.
